1. Read the following interview. Write the letter of the reporter's question (A-K) on the line before the answer (1-9). There is one extra question you do not need to use. There is an example (0) at the beginning.

0) F

I started when I was eight. My mother was a teacher, so she wanted to start an athletics club for girls in my school, and I took up running as well.

1) _____

No! I was awful when I started! But thanks to my parents, I didn't give up.

2) _____

My parents, definitely. They were both teachers, so they taught me discipline, and were always there to support me.

3) _____

Since I had been such a terrible runner as a kid, always finishing behind the others, I felt happy when I became faster. I loved that I wasn't coming in last! So, I guess my motivation was to stay at the front, because I knew too well what it was like coming in last.

4) _____

Fantastic. From that first January back home, and then for nine months, I was on the cover of national magazines every week: Time, Newsweek.

5) _____

Before the race, I went over my race technique. While I was actually running, I only focused on what was happening around me, but I couldn't let that affect my race. I had to run my own race.

7) _____

It was the best of all the Olympics I've been to. The location was perfect, the people were relaxed and fun, the food was great, and the atmosphere was the best of all the games I've attended.

8) _____

Determination, being focused, and being able to get along with people. Even in running, which is considered an individual sport, it's important to get along with others because you have to like and respect your coach - that's key.

9) _____

Skippy the Hamster

A few months ago I visited my friends Philip and Rina. When I arrived at their house, though, I realised I was not visiting just them. (0) C

Skippy is a Syrian Hamster. (10) _____ They are covered with beautiful golden-brown hair, with a large white "belt" from chest to waist.

When Rina and Philip bought Skippy from the pet shop, they thought it was a male hamster. But some weeks later, they came home to find Skippy with seven babies in the cage. (11) _____ Thank goodness they had not given her a boy's name.

Seven babies seem to be quite a lot, but it is very important for hamsters to have a large number of babies. (12) _____ Therefore, if they did not have a lot of little ones, hamsters as a group would soon die out. This is true of other small creatures as well, like mice and rabbits.

I first had a look at Skippy's little ones a week or so after they were born. (13) _____ They really didn't do much other than eat from their mother's breast. A week later, however, the little hamsters had some hair, even though there was still a lot of pink skin to be seen. By the time they were about four weeks old, they were completely covered in fur (other than their nose, tail, and paws). (14) _____

Rina and Philip gave six of the babies away to friends, but they kept one, a boy named Niko, for themselves. (15) _____ I love watching them run on their treadmills, stuff food into the pouches of their cheeks, or stand on their hind legs in an attempt to get out of their cages. Studying and caring for hamsters can teach us a great deal about biology, responsibility and, of course, cuteness.
